

Creating the
future of Lithuania
2014-2020 Operational
Programme for the
European Union Funds
Investments in Lithuania

UAB Geobaltic is currently implementing the project “Optimization of geophysical research by developing innovative robotic technologies and automated control systems (Georobot)”, No. J05-LVPA-K-03-0004.

The project is co-financed by the European Regional Development Fund, and the support is provided under the measure for the implementation of Priority 1 of the European Union Funds Investment Operational Programme for 2014-2020 “Promotion of Research, Experimental Development and Innovation” No. J05-LVPA-K “Intellect. General Science – Business Projects”.

The aim of the project implementation is to increase the company's innovation potential.

The project implementation began in June 2018 and ended in May 2020.

The project budget – up to EUR 704,761.14.

The funding allocated for the project – EUR 501,122.09.
